Indexes to *CORROSION*
Volume 49, Nos. 1-12 (1993)

Title Index

January (No. 1)

Effect of Widmanstatten Structure on Protection Potential of Ti-6Al-2Sn-4Zr-2Mo (0.1 Si) Alloy in 1 M NaBr Solution
V.S. Raja, R.D. Angal, and M. Suresh 2
Corrosion Potential Measurements on Type 304 SS and Alloy 182 in Simulated BWR Environments
D.D. Macdonald, H. Song, K. Makela, and K. Yoshida 8
Hydrogen-Induced Cracking of Linepipe Steels. Part 1—Determination of Threshold Hydrogen Concentration and pH
R.W. Revie, V.S. Sastri, G.R. Hoey, R.R. Ramsingh, D.K. Mak, and M.T. Shehata 17
Sealing and Anti-Corrosive Action of Tannin Rust Converters
J. Gust and J. Bobrowicz 24
Depth Distribution of Lithium in Oxidized Binary Al-Li Alloys Determined by Secondary Ion Mass Spectrometry and Neutron Depth Profiling
K.K. Soni, D.B. Williams, D.E. Newbury, P. Chi, R.G. Downing, and G. Lamaza 31
Effects of Sensitization Heat Treatment on SCC of Type 316L Stainless Steel in Hot Lithium Hydroxide Solution
J.H. Zheng and W.F. Bogaerts 42
SCC Behavior of an Al-3.7 wt% Zn-2.5 wt% Mg Alloy Before and After Welding in 3.5% NaCl Solution
C.-M. Liao 52
Technical Note: Dezincification of Alpha-Brass in Crevices
R.C. Newman and T. Shahrabi 60
Microbiologically Induced Corrosion of UNS N04400 in Seawater
V.K. Gouda, I.M. Banat, W.T. Riad, and S. Mansour 63
Chemical Treatment of Corroding Steel Reinforcement After Removal of Chloride-Contaminated Concrete
W.D. Collins, R.E. Weyers, and I.L. Al-Qadi 74

February (No. 2)

Discussion on "Electrochemical Potential Measurements Under Simulated BWR Water Chemistry Conditions"
D.D. Macdonald (Reply by C.C. Lin) 90
Technical Note: Analysis of Pulse Height in the Presence of Noise: Applications to Cathodic Protection
R. Srinivasan and J.C. Murphy 94
Environmental Cracking Susceptibility of AISI 422 Stainless Steel in NH_4HCO_3/NH_4OH Solution at 70°C
J.R. Scully and H.S. Scully 99
Microbiologically Influenced Corrosion of Steel During Putrefaction of Seawater: Evidence for a New Mechanism
M. Eashwar, P. Chandrasekaran, G. Subramanian, and K. Balakrishnan 108
Electrochemical Growth of Iron Sulfide Films in H_2S-Saturated Chloride Media
H. Vedage, T.A. Ramanarayanan, J.D. Mumford, and S.N. Smith 114
Inhibition of Acid Corrosion of Steel by Some S-Alkylisothiouronium Iodides
S.T. Arab and E.A. Noor 122
Corrosion Behavior of Two-Phase Fe-Mn-Al Alloys in 3.5% NaCl Solution
S.T. Shih, C.Y. Tai, and T.P. Perng 130
Electrochemical Corrosion Behavior of Alloy 400: Intergranular Corrosion in Acidic Na_2SO_4 Solutions
P.K. De and A. Bose 135
Stress Corrosion Testing of Irradiated Type 304 SS Under Constant Load
A.J. Jacobs, G.P. Wozadlo, and S.A. Wilson 145
Temperature Dependence of Steel Wastage in a Bubbling Fluidized Bed Simulator
S.S. MacAdam and J. Stringer 156
Control of Corrosion by Inhibitors in Drilling Muds Containing High Concentration of H_2S
Z. Jiashen and Z. Jingmao 170

March (No. 3)

Passivity Breakdown and PZC of Aluminum Chloride Water System
S. Paul, P.K. Mitra, and S.C. Sirkar 178
Corrosion of Mild Steel Under Anaerobic Biofilm
W. Lee and W.G. Characklis 186
Current and Potential Distribution on a Coated Pipeline with Holidays. Part I—Model and Experimental Verification
K.J. Kennelley, L. Bone, and M.E. Orazem 199

Current and Potential Distribution on a Coated Pipeline with Holidays. Part II—Comparison of the Effects of Discrete and Distributed Holidays
M.E. Orazem, K.J. Kennelley, and L. Bone 211
Accumulation of Trihalide Ions Caused by Corrosion
Y. Tsukaue, A. Kudo, G. Nakao, H. Yamasaki, and S. Kimura 220
Water Transport in Organic Coatings
F. Bellucci and L. Nicodemo 235
Effect of Chemical Composition and Ferrite Content on Room Temperature SCC Behavior of Austenitic Weld Metals
B. Raghunatha Rao, K. Prasad Rao, and K.J.L. Iyer 248
Increasing the Fatigue Life of 40Cr Steel in Drilling Muds with Corrosion Inhibitors
Z. Jiashen and Z. Jingmao 256

April (No. 4)

Passive Films and Corrosion Protection Due to Phosphonic Acid Inhibitors
J.L. Fang, Y. Li, X.R. Ye, Z.W. Wang, and Q. Liu 266
Effects of AC-Modulated Passivation and Post-Treatment on Composition and Stability of Passive Films
G.-L. Song, C.-N. Cao, and H.-C. Lin 271
Application of Measurement Models for Analysis of Impedance Spectra
P. Agarwal, O.C. Moghissi, M.E. Orazem, and L.H. Garcia-Rubio 278
Protection of Pure Iron Against High-Temperature Oxidation Using Metaborate and Metasilicate Coatings
Z. Husain 290
Formation and Transformation of Magnetite (Fe_3O_4) on Steel Surfaces Under Continuous and Cyclic Water Fog Testing
S. Nasrazadani and A. Raman 294
Stimulated Decomposition of $Fe(OH)_2$ in the Presence of AVT Chemicals and Metallic Surfaces—Relevance to Low-Temperature Feedwater Line Corrosion
P.S. Joshi, G. Venkateswaran, K.S. Venkateswarlu, and K. Annaji Rao 300
AC-Induced Pitting of Tin-Coated Copper Utility Cables
O.J. Van Der Schijff and O.F. Devereux 310
Crack Tip Corrosion: Hydrogen Depolarization and Its Inhibition
O.V. Kurov 315
Intergranular Stress Corrosion Cracking of Sensitized Type 304 Stainless Steel in Sodium Sulfate at Approximately 100°C
K. Tanno, H. Yashiro, Y. Kawamura, K. Umegai, and N. Kumagai 319
Effect of N-Alkylbetaines on the Corrosion of Iron in 1 M HCl Solution
N. Hajjaji, I. Rico, A. Srhiri, A. Lattes, M. Soufiaoui, and A. Ben Bachir 326
Electrochemical Polarization Method to Detect Temper Embrittlement of 321 Stainless Steel
X. Mao and W. Zhao 335
Telluric Effects on a Buried Pipeline
B.A. Martin 343

May (No. 5)

Technique for Measuring Stress Corrosion Cracking of Metallic Electrodes in Aqueous Solutions
K. Habib, G. Carmichael, R. Lakes, and W. Stwalley 354
Corrosion Behavior of Low-Residual Carbon Steels in a Sour Environment
J.N. Al-Hajji and M.R. Reda 363
Corrosion Fatigue of 316L Stainless Steel in Hot LiOH Solution
J.H. Zheng, D.J. Duquette, and W.F. Bogaerts ... 372
Influence of Potential, Chlorides, pH, and Precharging Time on Embrittlement of Cathodically Polarized Prestressing Steel
W.H. Hartt, C.C. Kumria, and R.J. Kessler 377
Current Efficiencies in Localized Corrosion Cells
R.J. Brigham 386
Roles of Microalloying Elements in Hydrogen Induced Cracking Resistant Property of HSLA Steels
H.-Y. Liou, R.-I. Wei, and S.-C. Wang 389
Repassivation of 304 Stainless Steel Investigated with a Single Scratch Test
T.A. Adler and R.P. Walters 399
Alternative for Evaluating Sour Gas Resistance of Low-Alloy Steels and Corrosion-Resistant Alloys
S. Tsujikawa, A. Miyasaka, M. Ueda, S. Ando, T. Shibata, T. Haruna, M. Katahira, Y. Yamane, T. Aoki, and T. Yamada 409
Assessment of Fire Damage to Pressure Vessels in a Refinery Unit
J.L. Hau 420

June (No. 6)

Fluid Flow Effects on CO_2 Corrosion Resistance of Oil Well Materials
K. Denpo and H. Ogawa 442
Synergistic Effects in the Inhibition of Copper Corrosion
S. Gonzalez, M.M. Laz, R.M. Souto, R.C. Salvarezza, and A.J. Arvia 450
Constitution of Green Rust and Its Significance to the Corrosion of Steel in Portland Cement
K.K. Sagoe-Crentsil and F.P. Glasser 457
Effect of Microstructure on Corrosion Behavior of a 6% Cr White Iron Alloyed with Mn and Cu
V. Kumar and A. Patwardhan 464

Inhibition of Steel Corrosion by Thiourea Derivatives
I. Singh 473
Activation of an Fe 16 wt%, Cr 11 wt% Nickel Alloy After Scribing
Z.-M. Yao and A. Bronson 479
Inhibitive Behavior of Cadmium Sulfate on Corrosion of Aluminum in Hydrochloric Acid
Q.H. Cai, Y.K. Shan, B. Lu, and X.H. Yuan 486
Corrosion Behavior of 8090 Al-Li Alloy
Z.Q. Hu, Y. Zhang, and Y.L. Liu 491
Effect of Ozone on Corrosion of Metals Used in Cooling Towers
B. Yang, D.A. Johnson, and S.H. Shim 499
Effect of Composition on Corrosion Resistance of High-Alloy Austenitic Stainless Steel Weld Metals
P.I. Marshall and T.G. Gooch 514

July (No. 7)

Hydrogen-Induced Cracking of Line Pipe Steels Used in Sour Service
R.W. Revie, V.S. Sastri, M. Elboujdaini, R.R. Ramsingh, and Y. Lafreniére 531
High-Temperature, Aqueous-Phase Diffusion of NaCl through Simulated Deposits of Corrosion Products
P.J. Millett and J.M. Fenton 536
Effects of Vanadium on Polarization of 18% Cr Ferritic Stainless Steel
R.D. Davies 544
Accelerated Corrosion Test for Aluminum-Zinc Alloy Coatings
T.C. Simpson 550
Coke Formation on Preoxidized Iron and Nickel in a CH_4-H_2 Gas Atmosphere at 1,000°C
S. Tokura, N. Otsuka, and T. Kudo 561
Corrosion Behavior and Inhibitive Effects of Organotin Compounds on Nickel in Formic Acid
R.N. Singh and V.B. Singh 569
Localized Corrosion of Alloy 600 in Thiosulfate Solution at 25°C
I.J. Yang 576
Effects of Cold Work on Stress Corrosion Cracking of Type 316L Stainless Steel in Hot Lithium Hydroxide Solution
J.H. Zheng and W.F. Bogaerts 585
Synergistic Effects of Inorganic and Organic Cations on Inhibitive Performance of Propargyl Alcohol on Steel Dissolution in Boiling Hydrochloric Acid Solution
D.D.N. Singh and A.K. Dey 594
Electrochemical Measurements on Concrete Bridges for Evaluation of Reinforcement Corrosion Rates
J. Flis, S. Sabol, H.W. Pickering, A. Sehgal, K. Osseo-Asare, and P.D. Cady 601

August (No. 8)

Technical Note: Stress Corrosion Cracking of Iron-Boron-Silicon Metallic Glasses in HCl Solution
K. Habib, R. Nessler, and K. Moore 619
Sodium Molybdate as a Corrosion Inhibitor of Mild Steel in Natural Waters. Part 1: Flow Rate Effects
D.G. Kolman and S.R. Taylor 622
Sodium Molybdate as a Corrosion Inhibitor of Mild Steel in Natural Waters. Part 2: Molybdate Concentration Effects
D.G. Kolman and S.R. Taylor 635
Inhibition Effects of I^- and I_2 on Stress Corrosion Cracking of Stainless Steel in Acidic Chloride Solutions
Y.L. Huang, C.-N. Cao, M. Lu, and H.-C. Lin 644
Use of a Constant Deflection Test to Evaluate Susceptibility to Irradiation-Assisted Stress Corrosion Cracking
A.J. Jacobs, G.P. Wozadlo, and G.M. Gordon 650
Corrosion Behavior of Stainless Steel in Phosphoric Acid Polluted by Sulfide Ions
A. Bellaouchou, A. Guenbour, and A. Ben Bachir 656
Accelerated Test Method for Assessing Corrosion and Weathering of Paints for Atmospheric Corrosion Control
B.S. Skerry and C.H. Simpson 663
Analysis of Large Plastic Deflections in C-Rings Used in Accelerated Testing for Stress Corrosion Cracking
C.F. Lo, W.E. Mayo, S. Weissmann, and W.H. Cullen 675
Technical Note: Corrosion Potential for Aluminum Alloys Measured by ASTM G 69
T.D. Burleigh, R.C. Rennick, and F.S. Bovard 683
CO_2 Corrosion of N-80 Steel at 71°C in a Two-Phase Flow System
C.A. Palacios and J.R. Shadley 686
Inhibition of Hydrogen Permeation in Steels Corroding in Sour Fluids
R.L. Martin 694

September (No. 9)

Polarization and Resistivity Measurements of Post-Crystallization Changes in Amorphous Fe-B-Si Alloys
I. Chattoraj, A.K. Bhattamishra, and A. Mitra 707
Effects of Temperature on Crack Growth Rate in Sensitized Type 304 Stainless Steel and Alloy 600
P.L. Andresen 714
Determination of Coating Deterioration with EIS: Part II. Development of a Method for Field Testing of Protective Coatings
C.H. Tsai and F. Mansfeld 726

Influence of Homogenization and Artificial Aging Heat Treatments on Corrosion Behavior of Mg-Al Alloys
T. Beldjoudi, C. Fiaud, and L. Robbiola 738
Corrosion, Passivity, and Pitting of Carbon Steel in Aqueous Solutions of HCO_3^-, CO_2, and Cl^-
K. Videm and A.M. Koren 746
Technical Note: Adherence of Sulfide Mineral Layers Produced by Corrosion of Copper Alloys
M.B. McNeil, A.L. Amos, and T.L. Woods 755
Growth Behavior and Corrosion Resistance of 5% Al-Zn Coating
K.L. Lin, J.K. Ho, C.S. Jong, and J.T. Lee 759
Stability of the Passive State of Ni-Zr Glassy Alloys
M. Janik-Czachor 763
Initiation of Crevice Corrosion by Stray Current on Stainless Steel Propeller Shafts
D.R. Lenard and J.G. Moores 769
Design of an Electrochemical Probe for Monitoring Susceptibility of Steel in Pickling to Hydrogen-Induced Cracking
Y.F. Cheng and Y.L. Du 776

October (No. 10)

Influence of Heat Treatment and Grain Shape on Exfoliation Corrosion of Al-Li Alloy 8090
D.J. Kelly and M.J. Robinson 787
Effect of Specimen Width on Stress Corrosion Cracking of Type 304 Stainless Steel
R. Nishimura 796
Effects of Ni on Stress Corrosion Susceptibility of High-Cr Ferritic Stainless Steels in Hot Cl^- Solution
H.-S. Kwon and S.-P. Jang 802
Corrosion of Cu-Ni Alloys in Sulfide-Polluted Seawater
J.N. Al-Hajji and M.R. Reda 809
Influence of Sodium Salts of Organic Acids as Additives on Localized Corrosion of Aluminum and Its Alloys
I.A. Raspini 821
Peptide Interactions with Steel Surfaces: Inhibition of Corrosion and Calcium Carbonate Precipitation
E. Mueller, C.S. Sikes, and B.J. Little 829
Accelerative Effect of Wear on Corrosion of High-Alloy Stainless Steel
X. Jiang, S. Li, D. Tao, and J. Yang 836
Nonequilibrium Alloying of Graphite-Reinforced Aluminum Metal Matrix Composites
T.R. Schrecengost, B.A. Shaw, R.G. Wendt, and W.C. Moshier 842
Erosion in Disturbed Liquid/Particle Pipe Flow: Effects of Flow Geometry and Particle Surface Roughness
J. Postlethwaite and S. Nesic 850
Performance Variances of Galvanized Steel in Mortar and Concrete
W.G. Hime and M. Machin 858
Technical Note: Low-pH Stress Corrosion Crack Propagation in API X-65 Line Pipe Steel
B.A. Harle and J.A. Beavers 861

November (No. 11)

Effects of Carbides on Susceptibility of Alloy 600 to Stress Corrosion Cracking in High-Temperature Water
R.B. Rebak, Z. Xia, and Z. Szklarska-Smialowska 867
Kinetics of Passive Film Formation on Scratched Bare Surfaces of Stainless Steels in Magnesium Chloride Solutions
D. Li, X. Mao, and R. Zhu 877
Applicability of Repassivation Potential for Long-Term Prediction of Localized Corrosion of Alloy 825 and Type 316L Stainless Steel
N. Sridhar and G.A. Cragnolino 885
Influence of Impurity Elements on Electrochemical Activity of Aluminum Activated by Indium
C. Breslin, L.P. Friery, and W.M. Carroll 895
Effects of γ-ray Irradiation on Crack Growth of Sensitized Type 304 Stainless Steel in 288°C Water
K. Nakata, S. Shimanuki, H. Anzai, M. Fuse, and S. Hattori 903
Influence of Cathodic and Anodic Currents on Cavitation Erosion
J.G. Auret, O.F.R.A. Damm, G.J. Wright, and F.P.A. Robinson 910
Evaluation of Corrosion Inhibitors for Component Cooling Water Systems
D.B. Alexander and A.A. Moccari 921
Corrosion of Nickel-Based Alloys in Acidified Lithium Chloride Solutions
S.J. Pawel 929
Corrosion of Steel in Cracked Concrete
N.S. Berke, M.P. Dallaire, M.C. Hicks, and R.J. Hoopes 934

December (No. 12)

Technical Note: Improving Corrosion Resistance of Magnesium by Nonequilibrium Alloying with Yttrium
P.L. Miller, B.A. Shaw, R.G. Wendt, and W.C. Moshier 947
Stress Corrosion Cracking Characteristics of a Range of Pipeline Steels in Carbonate-Bicarbonate Solution
R.N. Parkins, E. Belhimer, and W.K. Blanchard Jr. 951
Effects of Environment on Localized Corrosion of Copper-Based, High-Level Waste Container Materials
N. Sridhar and G.A. Cragnolino 967
Electrochemical Investigations of Pitting Corrosion in Nitrogen-Bearing Type 316LN Stainless Steel
G.C. Palit, V. Kain, and H.S. Gadiyar 977

Correlation of Steel Corrosion in Pipe Flow with Jet Impingement and Rotating Cylinder Tests
K.D. Efird, E.J. Wright, J.A. Boros, and T.G. Hailey 992

Effects of Moisture Availibility on Corrosion Kinetics of Steel Embedded in Concrete
J.A. González, W. López, and P. Rodríguez 1004

Subject Index

A

Accelerated corrosion tests
for Al-Zn coatings, 550
for organic coatings, 663
for stress corrosion cracking of C-ring specimens, 675
Acid corrosion
of carbon steels, 122
of iron, 326
Acid inhibitors. *See also* **Inhibitors**
for pitting resistance of aluminum in chloride solutions, 821
Acid pickling
and hydrogen-induced cracking of carbon steels, 776
Activation
of Ni-base alloys, 479
of pure aluminum in acidic chloride solutions, 895
Aging embrittlement
of type 321 SS, 335
Alloying. *See also* **Nonequilibrium alloying**
of austenitic stainless steel weld metals, effect on pitting resistance, 514
of ferritic stainless steels
effect on anodic polarization, 544
effect of nickel on SCC resistance, 802
of high-strength, low-alloy steels, effect on resistance to hydrogen-induced cracking, 389
of low-residual carbon steels, effect on resistance to sour brine, 363
of stainless steels, effect of nitrogen on pitting resistance, 977
All-volatile treatment chemicals
and corrosion of Ni-base alloys, 300
Alternating voltage modulated passivation
of stainless steels, 271
Aluminum
corrosion rate in hydrochloric acid, 486
electrochemical behavior, 895
passivation in chloride-containing water, 178
pitting corrosion, 821
Aluminum-base alloys
Al-Li alloy 8090
corrosion behavior, effect of heat treatment on, 491
exfoliation corrosion, 787
Al-Li alloys, oxidation, 31
Al-3.7Zn-2.5Mg, SCC of weldments, 52
corrosion potential determination by ASTM standard test methods, 683
Aluminum-zinc coatings
accelerated testing, 550
atmospheric corrosion, 550
coating thickness, 759
corrosion resistance, 759
diffusion behavior, 759
Ammonium bicarbonate
and environmentally assisted cracking of stainless steels, 99
Ammonium hydroxide
and environmentally assisted cracking of stainless steels, 99
Amorphous metals. *See also* **Metallic glasses**
crystallization, 707
electrochemical behavior, 707
grain growth, 707
potentiodynamic polarization, 707
resistivity, 707
Anodic behavior
of Ni-Zr metallic glasses, 763
Anodic current
and cavitation erosion of type 304 SS, 910
Anodic polarization
of ferritic stainless steels, 544
of magnesium, 947
of Ni-Cu alloys, 135
Artificial aging
of Mg-base alloys, effect on corrosion resistance, 738
Atmospheric corrosion
of Al-Zn coatings, 550
of organic coatings, 663, 726
of reinforced concrete, 1,004

of structural steels, 294
ATV chemicals. *See* **All-volatile treatment chemicals**

B

Biofilm formation
on carbon steels, 186
Biological corrosion. *See* **Microbiologically induced corrosion**
Boiling water reactors
and corrosion of stainless steels, 8, 90, 145, 650
Bridges
corrosion measurements of reinforcing steels, 601
Brine, sour. *See* **Sour brine**

C

Cadmium sulfate
as inhibitor for aluminum in hydrochloric acid, 486
Calcium nitrite
as inhibitor for reinforced concrete, 934
Carbides
and stress corrosion cracking of alloy 600, 867
Carbon deposition
on pyrolysis tubes, 561
Carbon dioxide
and corrosion rate of oil and gas production equipment, 442, 686
Carbon steels
acid corrosion, 122
acid pickling, 776
carbon dioxide-containing environments, corrosion rate in, 442
cooling tower waters, corrosion rate in, 499
corrosion fatigue, 694
corrosion products, 24, 114
dissolution in boiling hydrochloric acid, 594
hydrogen embrittlement, 473
hydrogen-induced cracking, 694, 776
hydrogen sulfide corrosion, 170
microbiologically induced corrosion, 108, 186
natural waters, corrosion in, 622, 635
passivation, 266, 746
pitting corrosion, 746
seawater, corrosion in, 829
sulfur-containing environments, aqueous corrosion in, 114
Carbon steels, low-residual. *See* **Low-residual carbon steels**
Cast irons
white irons, corrosion resistance in sodium chloride-containing solutions, 464
Cathodic current
and cavitation erosion of type 304 SS, 910
Cathodic polarization
and prestressed reinforced concrete, effect on corrosion resistance, 377
Cathodic protection
of buried pipelines, 343
of coated pipelines, 199, 211
of gas pipelines, 94
mathematical modeling of, 199, 211
monitoring of, 94
of prestressed reinforced concrete, 377
of type 316 SS propeller shaft, 769
Cavitation erosion
of type 304 SS, 910
Chloride-induced corrosion
of reinforced concrete, 74, 457
Chloride solutions
acidic, and stress corrosion cracking of type 321 SS, 644
hot, and stress corrosion cracking of ferritic stainless steels, 802
Coatings. *See* **Inorganic coatings; Aluminum-zinc coatings; Organic coatings; Protective coatings**
Coke formation
on pyrolysis tubes, 561
Cold working
of stainless steels, effect on SCC resistance, 585
Concrete
cracked, and corrosion of reinforcing steels, 934
reinforced. *See* **Reinforced concrete**
Constant deflection test
for evaluating irradiation-assisted SCC, 650
Constant-load tests
for irradiation-assisted SCC of stainless steels, 145
specimen width, and evaluation of SCC, 796
Cooling tower waters
and corrosion of carbon steels, 499
and corrosion of Cu-base alloys, 499
Cooling water systems
crevice corrosion, 921
pitting corrosion, 921
Copper
impedance, 278
pitting corrosion, 450
Copper-base alloys
alpha brass, dezincification of, 60
cooling tower waters, corrosion rate in, 499
Cu-Ni alloys
microbiologically induced corrosion, 755
polluted seawater, corrosion in, 809
localized corrosion, 967
Copper wire, tin-coated
galvanic corrosion, 310
pitting corrosion, 310
Corrosion fatigue
of carbon steels in sour fluids, 694
of low-alloy steel drill pipe, effect of inhibitors, 256
of type 316L SS, 372
Corrosion potential
of Al-base alloys by ASTM standard test methods, 683
of stainless steels in boiling water reactors, 8
Corrosion products. *See also* **Rust**
carbon steels
porosity, effect on corrosion resistance, 24
sulfur-containing environments, effect of, 114
galvanized steel, formation in concrete structures, 858
reinforced concrete, 457
stainless steels, by sodium chloride, 536

Corrosive wear
of 18-8 SS, 836
of fluidized bed combustor tubes, 156
of Ni-Fe-Cr alloys, 479
of type 304 SS, 399
Cracking. *See* **Environmentally assisted cracking; Hydrogen-induced cracking; Intergranular stress corrosion cracking; Irradiation-assisted stress corrosion cracking; Stress corrosion cracking; Sulfide stress cracking**
Crack propagation
in pipelines, determined by fracture mechanics, 861
Crack tip dissolution
during stress corrosion cracking of metals, 315
Crevice corrosion
of cooling water systems in pressurized water reactors, 921
stray current, effect of, 769
of type 304 SS, 386
of type 316 SS, 769
Crystallization
of amorphous metals, effect on corrosion, 707
Current efficiencies
in localized corrosion cells, measurement of, 386

D

Delamination
of organic coatings on steel, 726
Dezincification
of alpha brass, 60
Diffusion
of sodium chloride in stainless steel, 536
Drilling muds
and corrosion fatigue of SAE 5140 steel, 256
and hydrogen sulfide corrosion of carbon steels, 170
Drill pipe
corrosion fatigue of, 256

E

Electrochemical behavior
of amorphous metals, 707
Electrochemical impedance spectroscopy
of organic coatings, 235, 726
Electrochemical measurements
of corrosion of reinforced concrete in bridges, 601
Electrochemical polarization method
for monitoring aging embrittlement of type 321 SS, 335
Electrochemical potential
of stainless steels in boiling water reactors, 90
Embrittlement. *See* **Aging embrittlement; Hydrogen embrittlement**
Environment. *See also* **Sour gas environments**
and localized corrosion of Cu-base nuclear waste containers, 967
Environmentally assisted cracking
of type 422 SS, 99
Exfoliation corrosion
of Al-Li alloy 8090, 491, 787

F

Ferrite content
of austenitic stainless steel weldments, effect on SCC resistance, 248
Ferrous hydroxide
formation on Ni-base alloys, 300
Fire damage assessment
of oil refinery pressure vessels, 420
Fitness for service
of fire-damaged pressure vessels, 420
Flow-accelerated corrosion
of pipelines, 992
Fluid flow
and oil and gas production equipment, effect on corrosion rate, 686
and oil well materials, effect on corrosion rate, 442
and pipeline corrosion, 992
Fluidized bed combustor tubes
corrosive wear, 156
oxidation, 156
Formic acid
and corrosion of nickel, 569

G

Galvanic corrosion
of graphite-reinforced aluminum composites, 842
of tin-coated copper wire, 310
Galvanized steel
corrosion in concrete structures, 858
corrosion products, 858
corrosion resistance, 759
Gamma rays
and crack growth in type 304 SS, 903
Gas production
carbon steel corrosion in, 114, 746
low-alloy steel corrosion in, 686
Grain growth
in amorphous metals, effect on corrosion, 707
Grain shape
of Al-Li alloys, effect on exfoliation corrosion resistance, 787
Green rust
and reinforced concrete, effect on corrosion in chlorides, 457

H

Heat-affected zone
in aluminum alloy weldments, effect on SCC, 52
Heat treatment
of Al-Li alloys, effect on exfoliation corrosion resistance, 491, 787
of Ni-Cu alloys, effect on corrosion resistance, 135
of white irons, effect on corrosion resistance, 464
High-strength, low-alloy steels
hydrogen-induced cracking, 389
sour gas corrosion, 409
sulfide stress cracking, 409
High-temperature water
and alloy 600, effect on SCC, 714, 867
and type 304 SS
effect on irradiation-assisted SCC, 903
effect on SCC, 714

Holidays
in coated steel pipelines, 199, 211
Holographic interferometry
for measuring deformation during SCC, 354
Homogenization
of Mg-base alloys, effect on corrosion resistance, 738
Hot-dip galvanizing
bath temperature, effect on coating thickness, 759
coating thickness, 759
diffusion behavior, 759
HSLA steels. *See* **High-strength, low-alloy steels**
Humidity. *See* **Relative humidity**
Hydrochloric acid
and aluminum, effect on corrosion, 486
and carbon steel oil well materials, effect on corrosion, 594
and Fe-B-Si metallic glasses, effect on SCC, 619
and iron, effect on corrosion, 326
Hydrogen depolarization
during stress corrosion cracking of metals, 315
Hydrogen embrittlement
of carbon steels, 473
of prestressed reinforced concrete, 377
Hydrogen evolution
in nickel-base alloys, 300
Hydrogen-induced cracking
of carbon steels, 776
of carbon steels in sour fluids, 694
of high-strength, low-alloy steels, 389
monitoring of, 776
of pipeline steels, 17, 531
Hydrogen permeation
in carbon steels, 694
Hydrogen sulfide
and carbon steels, effect on corrosion, 170
and HSLA steels, effect on hydrogen-induced cracking, 389
and pipeline steels, effect on hydrogen-induced cracking, 17

I-J

Impedance measurement
for copper, 278
for organic coatings, 726
Impurities
in pure aluminum, 895
Indium salt
and activation of pure aluminum in acidic chloride solutions, 895
Inhibitors. *See also* **Acid inhibitors**
for aluminum in hydrochloric acid, 486
for carbon steels
in acids, 122, 473
in boiling hydrochloric acid, 594
in drilling muds, 170
in natural waters, 622, 635
in seawater, 829
in sour fluids, 694
for cooling water systems in pressurized water reactors, 921
for copper in sodium chloride-containing solutions, 450
for iron in hydrochloric acid, 326
for low-alloy steels in drilling muds, 256
for nickel in formic acid, 569
and passivation of carbon steels, 266
for reinforced concrete, 74, 934
for stainless steels in seawater, 829
for type 321 SS in acidic chloride solutions, 644
Inorganic coatings
for pure iron, 290
Intergranular corrosion
of Al-Li alloys, 491
of alloy 600, 576
of Ni-Cu alloys, 135
Intergranular stress corrosion cracking
of alloy 600, 867
of type 304 SS, 319
Iron
acid corrosion, 326
oxidation, 290
Iron-base alloys
Fe-Mn-Al alloys
corrosion in sodium chloride solutions, 130
microstructure, effect on corrosion resistance, 130
Iron sulfide films
growth on carbon steels, 114
Irradiation-assisted stress corrosion cracking
constant deflection test for, 650
of type 304 SS, 145, 650, 903
Jet impingement
and pipeline corrosion, 992

L

Line pipe steels. *See* **Pipelines**
Lithium chloride
and corrosion of nickel-base alloys, 929
Lithium hydroxide
and corrosion fatigue of type 316L SS, 372
and stress corrosion cracking of type 316L SS, 42, 585
Localized corrosion
of Cu-base nuclear waste containers, 967
Low-alloy steels
carbon dioxide-containing environments, corrosion behavior in, 686
SAE 5140, drill pipe, corrosion fatigue of, 256
Low-residual carbon steels
corrosion in sour brine, 363

M

Magnesium
anodic polarization behavior of, 947
Magnesium-base alloys
Mg-Al, effect of heat treatment on corrosion resistance, 738
Magnesium chloride
and repassivation of scratched stainless steel surfaces, 877
Magnetite
formation on structural steels, 294
Mathematical modeling
of cathodic protection of coated pipelines, 199, 211
of impedance spectra, 278
of stress corrosion cracking of metallic electrodes, 354
Mercury porosimetry
of corrosion products on carbon steels, 24

Metallic glasses. *See also* **Amorphous metals**
anodic behavior, 763
passivation, 763
pitting corrosion, 763
stress corrosion cracking, 619
Metal-matrix composites
graphite-reinforced aluminum, galvanic corrosion of, 842
Microbiologically induced corrosion
of carbon steels, 108, 186
of Cu-base alloys, 755
of Ni-Cu alloys, 63
Microstructure
of Fe-Mn-Al alloys, effect on corrosion resistance, 130
of white irons, effect on corrosion resistance, 464
Mild steels. *See* **Carbon steels**

N

Natural waters
and corrosion of carbon steels, 622, 635
Neutron depth profiling
of oxidized Al-Li alloys, 31
Nickel
corrosion behavior in formic acid, 569
Nickel-base alloys
activation of, 479
alloy 400
anodic polarization behavior, 135
intergranular corrosion, 135
microbiologically induced corrosion, 63
alloy 600
intergranular corrosion, 576
intergranular SCC, 867
pitting corrosion, 576
sensitization, 714
stress corrosion cracking, 576, 714
alloy 825
pitting corrosion, 885
repassivation, 885
corrosion products, 300
corrosive wear, 479
hydrogen evolution, 300
lithium chloride solutions, effect on corrosion, 929
Nitrogen
and pitting resistance of type 316LN SS, 977
Nonequilibrium alloying
of graphite-reinforced aluminum composites, effect on galvanic corrosion, 842
of magnesium with yttrium, 947
of metal-matrix composites by sputtering, 842
Nuclear waste containers
Cu-base alloy, localized corrosion of, 967
stainless steel, localized corrosion of, 885

O

Oil production
carbon steel corrosion, 114, 442, 746
low-alloy steel corrosion, 686
stainless steel corrosion, 442
Organic acid salts
and inhibition of hydrogen polarization, 315
Organic coatings
accelerated testing, 663
atmospheric corrosion, 663
delamination, 726
impedance, 726
for steel, 235, 726
water diffusion in, 235
weathering resistance, 663
Oxidation
of Al-Li alloys, 31
of fluidized bed combustor tubes, 156
of pure iron, 290
Ozone
and carbon steels in cooling tower waters, effect on corrosion, 499
and Cu-base alloys in cooling tower waters, effect on corrosion, 499

P

Passivation. *See also* **Alternating voltage modulated passivation; Repassivation**
of aluminum, 178
of carbon steels, effect on aqueous corrosion, 746
of carbon steels by inhibitors, 266
of Ni-Zr metallic glasses, 763
of type 302 SS, 271
of type 316 SS, 271
Peptides
as inhibitor for steels in seawater, 829
Petrochemical production
carbon deposition on pyrolysis tubes, 561
pH
and Ni-base alloys in lithium chloride solutions, effect on corrosion, 929
and pipeline steels
effect on hydrogen-induced cracking, 17
effect on SCC, 861
Phosphonic acid
as inhibitor for carbon steels, 266
Phosphoric acid
and corrosion of Uranus B6 SS, 656
Pickling. *See* **Acid pickling**
Pipelines
carbon steel
crack propagation, 861
hydrogen-induced cracking, 17, 531
stress corrosion cracking, 861
cathodic protection, 94, 199, 211, 343
coating holidays in, 199, 211
flow-accelerated corrosion, 992
stress corrosion cracking, 951
underground corrosion, 343
Piping
slurry erosion, 850
Pitting corrosion
of alloy 600, 576
of alloy 825, 885
of aluminum, 821
of austenitic stainless steel weld metals, 514
of carbon steels, 746
of cooling water systems in pressurized water reactors, 921
of copper, 450
of Ni-Zr metallic glasses, 763
of Ti-base alloys, 2
of tin-coated copper wire, 310
of type 304L SS, 220
of type 304 SS, 386
of type 316LN SS, 977
of type 316L SS, 220, 885
Polarization behavior
of aluminum, 178

Polarization. *See* **Anodic polarization; Cathodic polarization; Polarization behavior; Potentiodynamic polarization**
Pollutants
sulfide in seawater, effect on corrosion of Cu-Ni alloys, 809
Potentiodynamic polarization
of amorphous metals, 707
Pressure vessels
fire damage, testing for fitness of service after, 420
Propargyl alcohol
as inhibitor for carbon steels in boiling hydrochloric acid, 594
Propeller shafts
cathodic protection, 769
crevice corrosion, 769
Protective coatings
for oxidation resistance of pure iron, 290
Pyrolysis tubes
carbon deposition on, 561
PZC behavior
of aluminum, 178

R

Reinforced concrete
atmospheric corrosion, 1,004
in bridges, corrosion rate, 601
chloride-induced corrosion, 74
corrosion products, 457
prestressed
cathodic protection of, 377
hydrogen embrittlement of, 377
Reinforcing steels
chloride-induced corrosion, 74
corrosion performance in cracked concrete, 934
Relative humidity
and atmospheric corrosion of reinforced concrete, 1,004
Repassivation. *See also* **Passivation**
of alloy 825, 885
of type 304 SS, 399
of type 316L SS, 877, 885
of type 316 SS, 877
of type 321 SS, 877
Resistivity
of amorphous metals, 707
Rust conversion
of carbon steel by tannin-containing agents, 24
Rust, green. *See* **Green rust**
Rust sealing
of carbon steel, effect on corrosion resistance, 24

S

Salt fog testing
of structural steels, 294
Scale formation
on carbon steels, effect of hydrogen sulfide, 114
Scratch tests
for corrosive wear of Ni-Fe-Cr alloys, 479
for determining repassivation of stainless steels, 399, 877
Seawater
and carbon steels, effect on corrosion, 108, 829
and Cu-Ni alloys, effect on corrosion, 809
and Ni-Cu alloys, effect on corrosion, 63
pollutants, effects of, 809
putrefaction, effects of, 108
and stainless steels, effect on corrosion, 829
Secondary ion mass spectrometry
of oxidized Al-Li alloys, 31
Sensitization
of alloy 600, 714
of type 304 SS, 319, 714, 903
of type 316L SS, 42
of type 321 SS, 335
Signal analysis
of cathodic protection systems, 94
Simulated service testing
for corrosive wear of fluidized bed combustor tubes, 156
for electrochemical potential of stainless steels in boiling water reactors, 90
Slurries
flow, effect on erosion rate of piping, 850
particle roughness, effect on erosion rate of piping, 850
Slurry erosion
of type 304 SS, 850
Sodium bicarbonate
and stress corrosion cracking of pipeline steels, 951
Sodium carbonate
and stress corrosion cracking of pipeline steels, 951
Sodium chloride
and aluminum, effect on passivity, 178
and copper, effect on corrosion, 450
and Fe-Mn-Al alloys, effect on corrosion, 130
and stainless steel, effect on high-temperature corrosion, 536
and Ti-base alloys, effect on pitting corrosion, 2
and white irons, effect on corrosion, 464
Sodium molybdate
concentration, effect on corrosion of carbon steels, 635
as inhibitor for carbon steels in natural waters, 622, 635
Sodium sulfate
and Ni-Cu alloys, effect on corrosion, 135
and type 304 SS, effect on intergranular SCC, 319
Solution treating
of Mg-base alloys, effect on corrosion resistance, 738
Sour brine
and low-residual carbon steels, effect on corrosion, 363
Sour gas environments
and HSLA steels, sulfide stress cracking of, 409
and pipeline steels, hydrogen-induced cracking of, 531
and steels, hydrogen permeation in, 694
and type 304 SS, stress corrosion cracking of, 409
and type 316L SS, stress corrosion cracking of, 409
Sputtering
for nonequilibrium alloying of graphite-reinforced aluminum composites, 842
Stainless steels
18-8, corrosive wear, 836
alloy 182, corrosion potential in boiling water reactors, 8

austenitic weld metals
pitting corrosion, 514
stress corrosion cracking, 248
corrosion products, 536
diffusion of sodium chloride in porous medium, 536
ferritic
anodic polarization, 544
stress corrosion cracking, 802
repassivation, 399, 877, 885
seawater corrosion, 829
type 302, passivation by alternating voltage, 271
type 304
cavitation erosion, 910
corrosion potential in boiling water reactors, 8
corrosive wear, 399
crevice corrosion, 386
electrochemical potential in boiling water reactors, 90
intergranular SCC, 319
irradiation-assisted SCC, 145, 650, 903
pitting corrosion, 386
repassivation, 399
sensitization, 319, 714, 903
slurry erosion of piping, 850
sour gas corrosion, 409
stress corrosion cracking, 409, 714, 796
type 304L, pitting corrosion, 220
type 316
cathodic protection, 769
crevice corrosion, 769
electrochemical potential in boiling water reactors, 90
passivation by alternating voltage, 271
type 316L
corrosion fatigue, 372
pitting corrosion, 220, 885
repassivation, 885
sensitization, 42
sour gas corrosion, 409
stress corrosion cracking, 42, 585
type 316LN, pitting corrosion, 977
type 321
aging embrittlement, 335
sensitization, 335
stress corrosion cracking, 644
type 420, corrosion rate in carbon dioxide-containing environments, 442
type 422, environmentally assisted cracking, 99
Uranus B6, corrosion behavior in phosphoric acid, 656
Steel-reinforced concrete. *See* **Reinforced concrete**
Steels, carbon. *See* **Carbon steels**
Steels, galvanized. *See* **Galvanized steel**
Steels, HSLA. *See* **High-strength, low-alloy steels**
Steels, low-alloy. *See* **Low-alloy steels**
Steels, structural. *See* **Structural steels**
Strain analysis
of stress corrosion cracking of C-ring test specimens, 675
Stray current
and crevice corrosion of type 316 SS, 769
Stray current noise
monitoring of, cathodic protection systems, 94
Stress corrosion cracking
accelerated tests for, 675
of Al-Li alloys, 491
of alloy 600, 576, 714
of aluminum alloy weldments, 52
of austenitic stainless steel weldments, 248
of carbon steels, 861
constant-load testing for, 796
of Fe-B-Si metallic glasses, 619
of ferritic stainless steels, 802
measurement of, in aqueous solutions, 354
of pipeline steels, 861, 951
of type 304 SS, 409, 714, 796
of type 316L SS, 42, 409, 585
of type 321 SS, 644
Structural steels
atmospheric corrosion, 294
Sulfate-reducing bacteria
corrosion of carbon steels by, 108, 186
corrosion of Cu-base alloys by, 755
corrosion of Ni-Cu alloys by, 63
Sulfide corrosion
of steel in oil and gas production, 114
Sulfide ions
in phosphoric acid, effect on corrosion of stainless steels, 656
Sulfide stress cracking
of HSLA steels, 409
Sulfuric acid
and anodic polarization of ferritic stainless steels, 544
and corrosive wear of 18-8 SS, 836
Surface deposit formation
on carbon steel, effect of temperature, 156

T-U

Telluric current
and corrosion of buried pipelines, 343
Temperature
and corrosion of Ni-base alloys in lithium chloride solutions, 929
Thiosulfate
and corrosion of alloy 600, 576
Thiourea compounds
as inhibitors for carbon steels in acids, 473
Tin-coated copper wire. *See* **Copper wire, tin-coated**
Tin-coated steels. *See* **Steels, tin-coated**
Titanium-base alloys
Ti-6Al-2Sn-4Zr-2Mo-0.1Si, Widmanstatten structure, effect on pitting corrosion, 2
Trihalide ions
and pitting corrosion of stainless steels, 220
Underground corrosion
of pipelines, 343
of utility cables, 310
Utility cables
underground corrosion of, 310

W-Z

Water chemistry
and corrosion potential of stainless steels in boiling water reactors, 8
Water diffusion
in organic coatings, 235

Water, high-temperature. *See* **High-temperature water**
Water, natural. *See* **Natural waters**
Water, saline. *See* **Saline water**
Wear. *See* **Corrosive wear**
Weathering resistance
of organic coatings, 663
Weldments
Al-base alloys, stress corrosion cracking, 52
Weld metals
austenitic stainless steels
pitting corrosion, 514
stress corrosion cracking, 248
ferrite content, effect on SCC, 248
Widmanstatten structure
and Ti-base alloys, effect on pitting resistance, 2
Yttrium
and magnesium, effect on corrosion resistance, 947

IMAGINE....

PRECISION ELECTROCHEMISTRY SYSTEMS FOR ALL KNOWN DC TESTS AS WELL AS AC IMPEDANCE TESTS....

USER FRIENDLY WINDOWS ENVIRONMENT....

INTERACTIVE AND SELECTIVE CALCULATION CAPABILITY....

CAN CONTROL UP TO 8 CELLS SIMULTANEOUSLY....

Measures DC and AC currents precisely down to 10 pA
Precision sinewave generation 1 milli-Hertz to 1 Mega-Hertz, digital signal processing
Output voltages to 100V, currents to 10 Amps with add on power modules
Displays input signals simultaneously in REAL TIME for...
BODE, NYQUIST and TOTAL IMPEDANCE plots during measurements

INTRODUCING THREE ELECTROCHEMISTRY SYSTEMS

CTS 18: BATTERY POWERED HANDHELD DC AND AC IMPEDANCE SYSTEM

CTS 24: THE PORTABLE POWERFUL DC AND AC IMPEDANCE SYSTEM

CTS 50: THE MULTIMEDIA DESKTOP ELECTROCHEMISTRY WORKSTATION

FAX OR CALL US FOR A DEMONSTRATION DISK, A DETAILED USER MANUAL, AN ON SITE DEMONSTRATION AND FOR OUR EXTREMELY COMPETITIVE PRICES AS WELL AS A LIBERAL FINANCING OPTION.
